**Understanding Brain
Development:
It isn't complicated but it
makes a dramatic difference!**

The human brain is an amazing and complex organ that allows each of us to think, feel, and act. The brain systems that regulate those activities are largely shaped by experience. This presentation provides participants with an easy to understand overview of brain basics. It also offers insights on the effects of poverty, stress, trauma, neglect and abuse. Increase all that you understand about child development and apply it to what you can do to make a positive impact!
